

ADVANTAGES OF FOAM

Foam provides maximum contact time for chemical effectiveness

Foam reduces the amount of labor needed to clean the aircraft

Foam offers savings in chemical and water usage

Engine Wash System

EWK

The new EWK is designed to collect the engine wash fluid after cleaning an engine on the AH64. This allows to clean the engines on the flight line without moving the AH64. This decreases labor as well as potential for accidents when moving the AH64. The tarp system is made of durable aluminum and can be set up within 10 minutes. Up to 4 engines can be washed before emptying the collection tank.
