

ADVANTAGES OF FOAM

Ability to foam around sensitive components

Variable Pressure

Adjustable flex nozzle

Fresh water rinse with the same unit

Reset Foam Unit

The PF 10VP low pressure foamer is ideal for use in avionics compartments or other areas sensitive areas. The unit has a variable pressure regulator and can give you reduced pressure down to 10 PSI foam discharge which minimizes splashing. The flexible nozzle allows you to apply the foam with pin point accuracy in sensitive areas. The wash rack fresh water line can connect to the back of the unit to regulate the low pressure rinse.
